March 17 ELR

April 14 ELR

May 19 ELR

June 9 ELR

July 14 ELR

August 11 ELR

Sept 8 ELR

Roster at 8am, Shooting Starts at 9 am

Yardages from 1500 to 2208 yds

Come on out and join us!

COURSE OF FIRE

Our targets are currently set at 1516, 1675, 1867, 1951 and 2208 yards, we have space to set targets out to 3600+ yards. Our terrain consists of hills, draws, valleys, saddles, and depressions oh and wind, lots and lots of wind. This course will challenge and bring out the best in you. We typically use three shooting points and rotate the shooter through. We utilize three strings of fire:

String #1 - each shooter will engage a single first round true cold bore target with one round only and then engage target 1 & 2 with 5 rounds each target.

String # 2 - each shooter will engage targets # 3 & 4 with 5 rounds each

String # 3 each shooter will engage the final target # 5 with 5 rounds

SCORING

First round hit = target distance (1516 yards= 1516 points)

Second round hit = target distance /2 (1516/2=758)

Third round hit = target distance /3 (1516/3=505)

Fourth round hit = target distance /4 (1516/4=379)

Fifth round hit = target distance /5 (1516/5=303)

Each shooter must hit each target to move on

GENERAL RULES, Extended Long Range (ELR)

- Any rifle under 45 pounds is allowed however, .50 caliber is the caliber limit.
- **Rifle weight is determined by its "Ready to fire" configuration.**
- Any rifle other than centerfire will require approval (muzzle loader etc...)
- The weight of all other shooting equipment is limited to 25 pounds.
- The bipod can only be attached to the rifle at a single point. The bipod may only have two points of contact with the ground. The foot of the leg that makes contact with the ground may not exceed 4 inches in width or length. The rifle and bipod must remain ridged when firing, there can be no recoil damping or movement of the rifle in relation to the bipod in anyway. Nothing can be placed on top of the bipod/rifle to add additional weight/support. Common examples of these are sandbags and stakes. No sharp pointed bipods which will damage the blast sheet are permitted.
- The shooter must make all adjustments to his/her rifle system once the string of fire begins. Examples, adjusting height of bipod/rifle, adjusting the scope or handling the ammo/loading the rifle. Once the string of fire begins, any forgotten equipment the shooter requires must be obtained by the shooter.
- The rear of the rifle may be supported by a bag or pad of any kind, a monopod or the shooter but not an adjustable style rest that is not attached to the rifle
- Any rifle optics and spotting scope system are allowed
- No team may use, at any time during the match, any instrumentation that collects or records environmental data from points forward of the firing line. No wind indicators may be added to the range area forward of the staging area and firing line.
- No weapon alibis, after a rifle has a second malfunction of the same type, any additional malfunctions disqualify the shooter and the rifle must be removed from the line. Once a malfunction has been detected, permission can be given by the range officials for the shooter to have additional help in clearing it.
- No practicing is allowed on the course the night before prior to the competition.
- There will be a **shooting position "box" for shooter and their spotters. Spectators must stay far enough away that they will not disturb the team currently shooting.**
- Shooters, Spotters and Wind Coaches will not call out target impacts. The scoring team will make the call on this and provide a clear and concise auditory indicator when a target has been hit. This policy is due to many spotters falsely calling impacts and confusing everyone there.
- **A target is deemed "Hit" when it is the first thing that the bullet strikes after** leaving the muzzle. Frame, strap and ground strikes that cause the target to move are considered misses
- Once shooters have finished their shooting string, they must quickly remove their equipment to allow the next team to set up. Both the previous and next team will handle weapons UNLOADED and with a CHAMBER FLAG or other visual indicator of an empty chamber.

2018 Spearpoint Ranch ELR Match Registration Form

1890 N. 215th Rd, Barnard, KS, 67418

Match Director
Steve Wirth
785-524-5330
e-mail: swirth@wildblue.net

Assistant Director
Gene Nowaczyk
816-223-6378
e-mail: gene@payloadspecialties.net

Name of Competitor: _____

Name of Spotter(s): _____

Address: _____

Phone# _____

e-mail: _____

Rifle Caliber / Cartridge: _____

Ballistics Program: _____

Describe the method you are using to gain proper elevation on any given target: (EXAMPLE *40 MOA rail with 50 MOA rings, can dial 90 MOA on the scope internally and have 62 MOA hold over with the reticle*) Also list other equipment you will be using,

FCSA member: (yes - no) NRA member: (yes - no)

Briefly describe your experience at shooting targets over 1500 yards, and any ELRWorld record events you may have attended. (helps in planning time lines)

Registrations will be accepted in the order received, a waiver must be signed on site before shooting, match fees are currently \$40.00 for a single day match and \$80.00 for a two-day match. *Match fees are subject to change*

Send completed form and payment (*check or money order*) to:
